

# Vyne Sync Installation Guide

1

## Begin the Installation Process with the Vyne Sync Tool.

The first step in the installation process is to locate your server, an essential part of setting up the Vyne Sync Tool.

Your server, or Database Server Computer, is usually found in a more secluded part of your dental office, often in a back room.

2

## Download the Vyne Sync tool on your server.

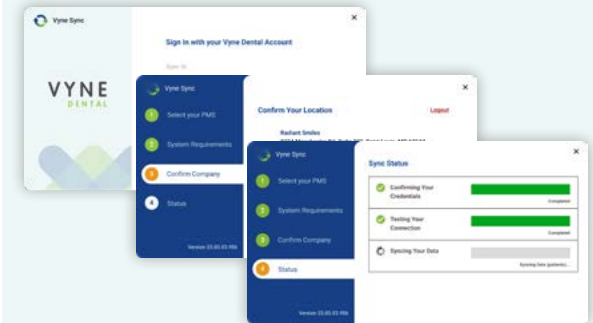

After identifying and accessing your server computer, log into your Vyne Trellis account. Click on your User Name in the upper right hand corner and select **“Downloads”**. Then select the **“Download”** button for Vyne Sync.

3

## Follow the step-by-step instructions.

Proceed by following the on-screen instructions until the setup is fully complete.

# Vyne Sync Installation Guide
